SPECIAL OFFERS

Special offers are coffees that we have discounted for various reasons. It may be because we are overstocked on a particular origin, or that the coffee has fallen below our quality expectations on arrival or a number of months after landing. In both of these situations, we will discount the coffee - we would much prefer the coffee to move at a loss sooner, rather than let the coffee decline over time (as this doesn't do our name, or the producers name any credit). These coffees now represent great value - especially vs. any coffees at that price level on the spot market. All of them have been thoroughly QCed and the notes below represent the most recent cupping notes and list any concerns we have (if there are any) with the quality.

RWANDA

Why have these been discounted?

"These coffees have been discounted because we have new Rwandans on the way (landing in December). We have QCed these coffees number of occasions, and are happy to report that there is no age showing in the cup and they are still tasting great. The coffees have mellowed in their acidity, and are perhaps a tiny bit more savoury than previously, but there is still plenty of sweetness, juiciness and complexity in the cups. The tasting notes have been updated to reflect how the coffees are tasting now. All of these coffees cup between 84.5 - 86 points. They will be exceptional for espresso applications and will work for filter too." - Fleur Studd
