SPECIAL OFFERS

Special offers are coffees that we have discounted for various reasons. It may be because we are overstocked on a particular origin, or that the coffee has fallen below our quality expectations on arrival or a number of months after landing. In both of these situations, we will discount the coffee - we would much prefer the coffee to move at a loss sooner, rather than let the coffee decline over time (as this doesn't do our name, or the producers name any credit). These coffees now represent great value - especially vs. any coffees at that price level on the spot market. All of them have been thoroughly QC'd and the notes below represent the most recent cupping notes and list any concerns we have (if there are any) with the quality.

KENYA

KENYA, Kiambu County	Petit AB	SL28, SL34, Batian	Washed	Aug-20	Bright lemon acidity, with notes of cherry and raisin. Lemongrass and cedar on the finish. Good for espresso.	4	30	Vac Pack	IN STOCK
----------------------	----------	--------------------	--------	--------	---	---	----	----------	----------

Why has this coffee been discounted?

"Petit AB has been discounted as it landed with a different cup quality than we expected. We anticipated the coffee would be cupping between 86-87 points, but have found it to be cupping closer to 82-83 points, with some noticeable staleness in the cup. The price has been dropped to accurately reflect the cup quality. This coffee presents a good acid structure and fruit character and will add juiciness and body to an espresso blend." - Team MCM
